

UNIDAD LÍNEA DE ACERO

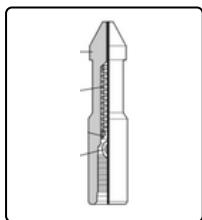

TABLA DE ESPECIFICACIONES TÉCNICAS DE EQUIPOS

Categoría	Descripción
Línea de Acero	Carrete de línea de acero de diámetro 0.125" de 7,500 m de longitud.
Enfriado	6 cilindros con potencia de 210-250 hp a 1900-2300 RPM.
Torque	520-560 lb/ft a 1400-1800 RPM, equipado con freno de escape.
Transmisión	6 Velocidades

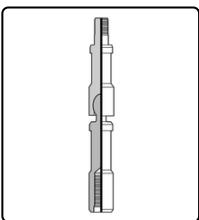

HERRAMIENTAS PARA LÍNEA DE ACERO

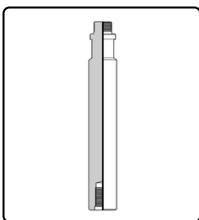

Rope Socket

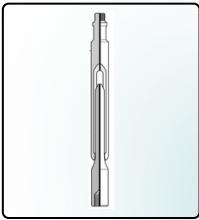

Junta de rodilla

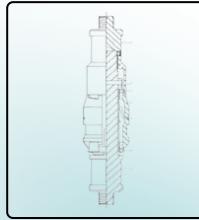

Barra de peso

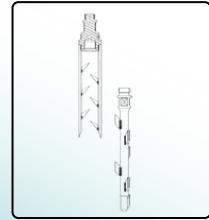

Tijera de eslabón

Operadora de camisa deslizable

Pescante Arpón

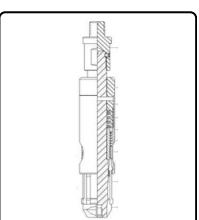

Pescante JDC

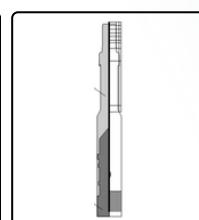

Pescante JUC

Pescante GS

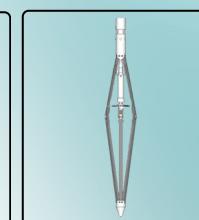

Block de impresión

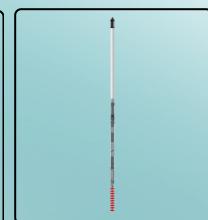

Perforador mecánico

Herramienta PLT

Cabeza disparo electrónica

HERRAMIENTAS PARA LÍNEA DE ACERO

Presión-
Temperatura

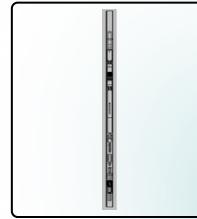

Rayos Gamma-CCL

Saturación
Hidrocarburos

Estrangulador de
fondo

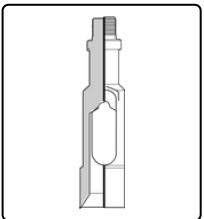

Válvula de pie

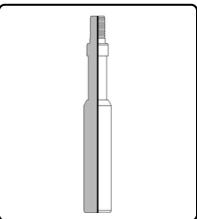

Tapón mecánico

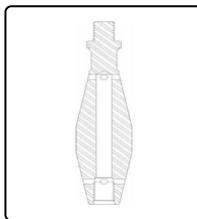

Cortador de
parafina

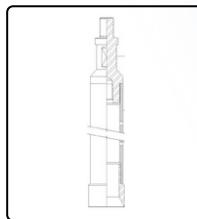

Caja ciega

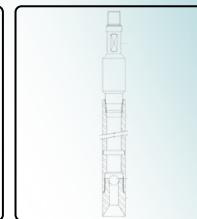

Troquelador

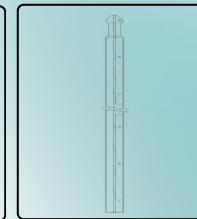

Pescante Overshot

Cubeta muestrera

Cortador de línea

Bloque para válvula
tormenta
